#### Mines and Mining Stocks

# LOST PACKER

Smelter to Start in a Few Days -Rich Ore Developed in No. 4 Tunnel.

acter has been printed about the Los Packer property," said Mr. McBeth during the afternoon, "and though little of it has emanated from official sources, the impression has gained ne currency that the mine is not all that it has been pictured. It is true, nevertheless, that the Lost Packer is really a big mine, a mine that has more ere in sight by long odds than the eption price of \$6 a share amounts to, and it is opening up bigger every day. During the past few weeks there have been important disclosures made have been important disclosures made in the fourth tunnel workings of the mine. Here they are now driving through a shoot of ore two feet of which will average, in addition to its fine copper contents, better than four ounces gold per ton. All through the mine conditions are such that it is impossible to close the proposition as any possible to class the proposition as any-thing but a bonanza of the first magnitude. The management has now de-cided to begin smelting its ores and the product of this plant will tell the tale of what the Lost Packer amounts to."

Mr. McBeth states that there is the greatest kind of activity all through the country from Mackay to Custer and Loon creek at the present time. There is some particular rustling for lead properties and, as the metal abounds in several of the districts, he looks for the making of some fine mines in the not distant future.

At Mackay operations are steadily progressing on the White Knob, and Mr. McBeth was well pleased with the condition of things as he found them on his way here. He will return hon in a day or two.

#### BULLION DISTRICT BOOMING.

Country South of Beowawe, Nev., in the Swim.

P. D. Delmas, founder of the Go Quartz and Keystone Developme companies, which are now successful operating in the old Bullion region about twenty-five miles south wawe, on the Southern Pacific lin Nevada, is in the city after spending some time at the latter company's properties looking after the installaon of machinery and getting the campaign of development under way. Both the Gold Quartz and the Keystone are now in the hands of energetic and competent managements, and Mr. Delmas giving his attention to other inter

The old Bullion region, a portion of which is in Lander and the rest in Eureka county, is on the boom, Mr. Del-mas states. Two towns, New Bullion and Tenabo, are both moving at a rap-id pace, with the latter destined, most likely, to hold the prestige. It now boasts a big department store, and from the manner in which people are flocking in it will not be long till it has

The Gold Quartz company's proper ty is producing fine ore and the man agement, which rests in Butte, is nov arranging to equip it with fine hoistin works. J. M. Anderson of Butte managing the property, and in th shaft workings he has exposed severa feet of gold ore that is being broker and sacked for shipment just as comes from the mine. In addition the shipping ore, which is regularly coming to this market, Mr. Delmas says there is exposed in the workings ten feet or more of ore that will run from \$10 to \$30 a top, and which will make an ideal milling product. The Gold Quartz, he declares, is rounding into a big bonanza mine and is doing as much or more than any other property in the district to attract the attention of capital to that region.

The Keystone Development company's property is located about eighteen miles southeast of the Gold Quartz, in Eureka county, and, aside from his interests, Mr. Delmas says it is entirely owned by Thomas Nevins & Sons, the New York bankers. A town is estab-Itshed at the mine and is called Nevins. The property is being developed through tunnels and a shaft, as well. The ledge is thirty feet thick and at a depth of eighty feet in the shaft the ore samples 8 per cent copper and near-ly twenty ounces in silver per ton. The

If you're interested in doing the things that make the house presentable let us send you a color card of Muresco Wall Finish and show you what can be done with it. A shade for any color scheme you want.

MORRISON, MERRILL & CO.

28 Main St.

company owns twenty-one claims and

Mr. Delmas is now arranging for the operation of a copper property in Tooele county, located by him on the line of the Sait Lake Route, between the stations, Sax and Vernon. The cop-per makes in a belt of porphyry which cuts the lime formation and has a width of eighty feet.

MINING STOCK EXCHANGE.

Market Is Behaving Well and Lively Times Are Ahead.

MAMMOTH SHIPS RICH ORE

MAMMOTH SHIPS RICH ORE

SELLS FOR \$12,000.

Without waiting to learn what the succome of the option on the Lost Packer's control will be, the management has decided to place the smelter at the property in commission and, during the next few days the fires will be dit and the making of high-grade gold-copper matte will begin. This is the news brought down from Custer, Ida., by Ravenal McBeth, the well known mining operator of that place who is in the city for a day or two.

"More or less news of a boom character has been printed about the Lost Packer property," said Mr. McBeth

Times Are Ahead.

The local mining stock market is behaving well. Thursday trading was rather quiet, but yesterday it picked up again and the sparring that was carried on for several stocks made it evident that buyers were in evidence for more stock than was to be had at the prices made. Beck Tunnel, Columbus Consolidated, New York, May Day and several other of the stocks traded in exhibited good strength and prices generally were firm. It has been previously stated that the market gives evidence of great activity in the fall and the evidence for more stock than was to be had at the prices made. Beck Tunnel, Columbus Consolidated, New York, May Day and several other of the stocks traded in exhibited good strength and prices generally were firm. It has been previously stated that the market gives evidence of great activity in the fall and the evidence that such will be the case is growing stronger every day. When stocks fail to go off materially during the hot days of summer there is no basis for arguing that they will weaken after the vacation period is end-the day and several other of the stocks traded in exhibited good strength and prices generally were firm. It has been previously stated that the market gives evidence of great activity in the fall and the evidence for more stock than was to be had at the prices made. Beck Tunnel, Columbus Consolidated, New York, May Day and several other of the stocks raid on ex

SHENANDOAH OPENING UP.

Good Springs Property Owned by Salt Lakers Is Shipping Regularly.

Judge J. W. Burton returned yesterday morning from a ten days' trip to the Shenandoah property in the Good Springs district, Nevada. He states that a force of ten men are kept on development work at the mine, and that the showing made is most satisfactory. Frequent shipments of rich lead ore are being made to the smelters here and, as indicating the character of the rock, the judge states that the lowest grade car so far marketed went 61 per cent lead. The last one carried 64 per cent lead and 10.5 ounces silver per ton. One carload is now in transit and another is being loaded for

Judge Burton, Samuel Newhouse and W. M. O'Meara of this city, and is not incorporated. The ledge being developed makes between a blue and white lime and its inclination into the earth is in the direction of a great porphyry Wabash. 100 at 68c.
Shares sold, 27,550.
Selling value, 17,102.

Ore and Bullion.

Ore and bullion settlements in the city yesterday, as reported by McCornick & Co., amounted to \$75,000, as follows: Silver, lead. gold and copper ores, \$18,000. dyke. It has been prospected for a long distance on the surface where it shows

ton says it was never so prosperous.

Properties are being worked all

market.

through that region, and not a few of them are making good. The intense heat is now interfering somewhat with mining and ore hauling, but another four weeks will bring a change in the temperature that is sure to have an exhilerating effect on everybody.

MAMMOTH'S RICH SHIPMENT. Ninety-eight Tons of Gold Ore Brings

Over \$12,000. For a little over ninety-eight tons of ore the Mammoth Mining company yes-terday received a check from the smelterday received a check from the smel-ter for \$12,143.93. The ore carried 6,7 ounces gold and 2.7 ounces silver per ton. Sixty more tons of the same kind of rock is now in the bins at the mine and another shipment will be made in a few days, when the lot has been in-creased to 100 tons. This ore, Presi-dent Samuel McIntyre stated during the afternoon, is coming largely from the 1.300 and 1.400 levels, though its exthe 1,300 and 1,400 levels, though its existence has recently been demonstrated

"When the shaft on the property was put down deep," said Mr. McIntyre, "and the shoots of ore in its immediate vicinity were pretty well worked out, a great many people, including not a few mining engineers, reached the conclusion that the property was pretty well done for. Since then we have been driving out on the different levels with the result that successive shoots of ore in new ground have been opened up. We are still pushing ahead and devel-We are still pushing ahead and developments are meeting every expectation, clean down to the bottom, which is now 2,260 feet below the collar of the shaft." President McIntyre stated also that a new condition had been disclosed in the bottom of the mine. One of the drifts has been progressing through a body of ore that was rich in both copper and gold. From this a change to a class of ore that is showing over 50 per class of ore that is showing over 50 per cent iron and about 2 per cent copper, with some gold and silver, has been entered. The iron appears as an oxide and the country is so porous that Mr. McIntyre does not expect the sulphide zone will be reached for possibly several hundreds of feet more in depth. He is anything but displeased over the appearance of the iron on the 2,260 level and he is confident that it will attach and he is confident that it will either lead into larger bodies of copper ore or that it will make big values in gold. Through the mass is scattered great chunks of exceedingly rich copper ore now, and he looks for that part of the mine to turn out big.

WATER FOR MINING PURPOSES.

Several Applications Are Filed With State Engineer.

Silver, 64%c per ounce. Copper (casting), 18 1-16c per pound. Lead, \$5.75 per 100 pounds. Mining Notes.

Superintendent Samuel McIntyre, jr., of the Mammoth, is up from camp on a short business trip.

Two cars of ore from Bingham, two from Tintic, one from Alta and four from Nevada were reported at the Pioneer sam-pler yesterday morning.

L. V. Shearer, the well-known mining operator and expert of Denver, came in yesterday morning on his way to Nevada, where he is going to take the measure of a proposition or two over there to which his attention has been called.

Bills of lading for another carload of ore from the Nevada Hills company's Fairview mines reached the local offices of the company yesterday. The consignment consists of thirty tons and was billed out of Hazen on the 2d.

Chairman H. S. Joseph of the Tintic Mine Managers' association committee on transportation, urges that the mine owners who have been asked by his committee for certain data to present to the railroad officials make it a point to get the required information into his hands as on as possible.

The first car of ore from the Monte zuma, at Bingham, to be shipped by the Porter-Bettles combination which is purchasing the property, has reached the sampler, and another car will follow to-day. While nothing but drifting through the ore is being done at present, a car-load is being taken out every two days or so. The Montezuma is rapidly devel-oping into a big mine.

The Silver Shield Mining company yesterday levied another 3-cent assessment. It will be delinquent on the 5th of next month. The company has been having

month. The company has been having trouble at Bingham over the water which flows from its tunnel, and in order that it may have absolute and unquestioned title to it and be free to use it for milling purposes, it has been formally filed upon in the state engineer's office.

Ploche Record.—William R. Wallace, a mining man from Salt Lake, interested in several dividend-paying mines at Park City, has been in town several days getting hold of mining property. He bonded the claims of Dave Borland at Jackrabbit and several other prospects around about; he made several neat little cash payments. Mr. Wallace is well pleased with this district and intends to visit us often.
